

LIFT AGAIN

"I'm glad to be back to my routine again"

– Thomas D., hernia patient

LIVE AGAIN PAIN FREE

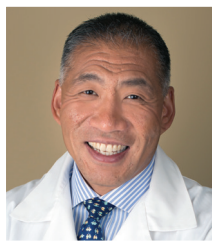

5 MILLION PEOPLE HAVE A HERNIA

MOST GO UNTREATED AND CAN LEAD TO MORE SERIOUS PROBLEMS LATER IN LIFE. The first Minimally Invasive Hernia Center in Westchester at St. John's Riverside Hospital is here to help.

The Hernia Center features Minimally Invasive procedures that enable our surgeons to repair hernias through a few small incisions. The technically advanced center offers several approaches that result in very precise hernia repairs. Minimally Invasive hernia surgery requires less anesthesia, has less pain and minimal scarring resulting in patients being able to return to normal activities quicker.

HERNIA CENTER

- First in Westchester
- Laparoscopic and robotic procedures
- 20,000+ hernia procedures
- Little to no scarring
- Shorter recovery time
